

# Loaded Bamboo Vanguard 38"

## Longboard Skateboard Deck - Flex 3

---

Product Details Sales Rank: #813891 in Sports & Outdoors Brand: Loaded  
Features The Loaded Vanguard longboard is an amazing board for surf-style cruising and carving. The Loaded Vanguard has quite a bit of flex and offers multiple flex options for full rider customization. It has a nice amount of camber as well to counter the flex so that when you ride the board levels out to be nice and flat. We have been fans of the Loaded Vanguard since it's early days and still use it for getting around to this day.

---

Product Description The one that started it all. Symmetrical shape and stance for a balanced center of gravity to increase the ability to weight the deck through turns for better control and energy generation. The sidecuts allow for decreased torsional stiffness between the feet to exploit the board's torsional energy to allow for greater nuances in the turning radius. Flex 1-5, with 1 being the stiffest and 5 the softest.

---

this is the best short longboard for carving& crusing downtown urban areas. if you tap the cut-outs w/ the back of the feet[esp if the trucks have 1 set of soft venom bushings], the board will turn like magic. If you get paris 180 trucks, 1 set of 80 duro venom[non cone] bushings to replace the[1 set] paris 92 duro & abec 11 82 duro or less or durians+silver bearing spacers=the best & sweetest cruising system money can buy. to be honest, if you attach the above recommended components to a piece of flat wood,it will be sweet cruising system. However, the vanguard is great as it is light weight & perfectly adapts to the above components. I even recommend it to the dervish which is annoying w/ the drop-down cut-out where the nuts tends to come loose[for me at least].

---

Great board !! See all 2 customer reviews...
